EDUCATION

University of Waterloo

Bachelor of Computer Science

Waterloo, ON

Aug 2023 — Present

- **GPA: 3.7 / 4.0** | Relevant Coursework: Algorithms, Data Structures, Operating Systems, Databases

EMPLOYMENT EXPERIENCE

Full Stack Software Developer | Python, Java, AWS, Jenkins, Sumo Logic

Sep 2025 — Dec 2025

Genesys Cloud

Toronto, ON

- Redesigned daily service health reports using **AWS Bedrock**, highlighting error patterns and week-over-week shifts to improve operational visibility.
- Improved performance and reduced compute cost by **50%** in AWS Lambda workflows by identifying cold-start and payload bottlenecks.
- Reworked distributed logging and tracing in **Sumo Logic**, cutting debugging time by **50%**.
- Maintained and delivered updates to **public APIs and backend services**, ensuring stability across release cycles.

Technical Solutions Developer | T-SQL, Python, Selenium, Power BI, PowerShell

Jan 2025 — Apr 2025

WatSPEED

Waterloo, ON

- Built and optimized **automated data pipelines** in Azure SQL and Power BI, cutting processing time by **50%**.
- Refactored and optimized complex **SQL queries**, improving performance and long-term maintainability.
- Automated recurring workflows using **Python, Selenium, and PowerShell**, reducing manual reporting by **80%**.
- Implemented validation checks for data migration to improve accuracy and trust in downstream dashboards.

Instructional Support Assistant | Python, Selenium, Bash, C++, SQL, pandas

Sep 2023 — Apr 2025

Cheriton School of Computer Science, University of Waterloo

Waterloo, ON

- Maintained and extended **Linux-based automated grading system** supporting **1,000+ students**, reducing weekly marking time from 10 hours to 1 hour.
- Developed **Python/Bash/C++ tooling** to improve automation coverage, reliability, and feedback consistency.
- Built automated data-collection workflows using **Python and Selenium**, cutting recurring manual work from 1 hour to **5 minutes**.

PERSONAL PROJECTS

PDF to MCQ Generator | FastAPI, Supabase, Docker

github.com/KuroganeToyama/pdf_to_mcq

- Designed and deployed a **full-stack web application** for converting uploaded PDF documents into interactive multiple-choice quizzes.
- Built **RESTful APIs** for document ingestion, processing, and quiz delivery with user-scoped authentication and storage.
- Integrated **LLM-based content generation** as a modular pipeline step, implementing **structured output validation and retry logic** to handle malformed or inconsistent model responses.

Resume Critique Web App | FastAPI, Supabase, Docker

github.com/KuroganeToyama/resume_critique

- Built a **full-stack web application** for resume evaluation, supporting multiple resume versions and progress tracking.
- Designed a hybrid evaluation pipeline with LLM-powered job analysis and a deterministic scoring engine using **fixed, weighted multi-dimensional evaluation** for consistent results.
- Implemented **LLM workflows** for rubric generation and structured extraction, isolating AI usage from deterministic evaluation logic.

EXTRACURRICULAR ACTIVITIES

Terminal and System Committee

Dec 2023 — Present

Computer Science Club, University of Waterloo

Waterloo, ON

- Operate and maintain **Linux servers and virtual machines** supporting internal and public-facing student services.
- Configure, upgrade, and monitor **self-hosted infrastructure** to ensure reliability and availability.
