EDUCATION

University of Waterloo

Bachelor of Computer Science

Waterloo, ON

Aug 2023 — Present

- Major Average: 87%, Cumulative Average: 88%, GPA: 3.7/4.0
- **Relevant Coursework:** Introduction to Database Management, Algorithms, Data Structures and Data Management, Operating Systems, Object-Oriented Programming

EMPLOYMENT EXPERIENCE

Full Stack Software Developer | Python, Java, AWS, Jenkins, Sumo Logic

Sep 2025 — Dec 2025

Genesys Cloud

Toronto, ON

- **Redesigned daily service health reports** in AWS Bedrock to highlight error patterns and week-over-week shifts, improving visibility into services requiring attention.
- **Improved performance and reduced compute cost by 50%** in AWS Lambda workflow services by identifying cold-start and payload-related bottlenecks and optimizing execution behavior.
- **Reworked distributed logging and trace visibility** in Sumo Logic, making issues easier to diagnose and cutting debugging time by 50%.
- **Maintained and delivered updates to public APIs and backend services** in Python and Java, ensuring comprehensive testing and stability across multiple release cycles.

Technical Solutions Developer | T-SQL, Python, Selenium, Power BI, PowerShell

Jan 2025 — Apr 2025

WatSPEED

Waterloo, ON

- **Built and maintained automated data pipelines** in Azure SQL and Power BI to support operational and financial reporting used across internal departments, cutting processing time by 50%.
- **Optimized and refactored SQL queries**, cutting execution time by 50% and making query logic easier to maintain and modify.
- **Automated recurring data-processing workflows** using Python, Selenium, and PowerShell, reduced manual reporting work by 80% and ensured consistent, on-schedule delivery of data insights.
- **Implemented data validation and correction checks** to identify and resolve inconsistencies after system migration, improving accuracy and trust in downstream dashboards and analytics.
- **Collaborated with finance and operations staff** to clarify reporting needs and ensure generated insights aligned with real decision-making requirements.

Instructional Support Assistant | Python, Selenium, Bash, C++, SQL, pandas

Sep 2023 — Apr 2025

Cheriton School of Computer Science, University of Waterloo

Waterloo, ON

- **Configured and maintained automated grading system** on Linux to support over 1,000 students, reducing weekly marking time from 10 hours to 1 hour.
- **Developed new features for the grading pipeline** (Python / Bash / C++), improving automation coverage and increasing clarity and consistency of assignment feedback.
- **Processed large-scale participation data**, ensuring accurate calculations and improving efficiency of ongoing data maintenance.
- **Tested and deployed a new grading system**, resolving issues in core functionality prior to release.
- **Created an automated data-collection tool** (Python / Selenium), reducing weekly workload from 1 hour to 5 minutes.

EXTRACURRICULAR ACTIVITIES

Terminal and System Committee

Dec 2023 — Present

Computer Science Club, University of Waterloo

Waterloo, ON

- Oversee servers and virtual machines owned by the Computer Science Club.
- Configure and upgrade servers, tools and services for internal and public use.
